Setting of FileZilla (for Windows)

Introduction

FileZilla is an FTP client software developed as open source. This manual uses the free version "FileZilla version 3.54.1" from <u>the FileZilla project</u>.

Please prepare the [SpinNet Access Information Sheet], in advance, as you will need [Mail address] and [Mail password] for the setup process.

Hereafter, "SpinNet Access Information Sheet" will be referred to as "Access Information Sheet".

Step 1

Launch "FileZilla".

[Launching FileZilla]

| E FileZilla | | | | | | | - 1 | n x |
|----------------------------|--|-------------------|-------------------|--------------|--------------|-----------------|-------------|--------------|
| File Edit View Tr | ansfer Server Bookn | arks <u>H</u> elp | | | | | | |

Choose "File" from menubar and call "Site Manager".

| Æ | FileZilla | a | | | | |
|------|---|---------|-----------|-----------|-----------|--------|
| File | Edit | View | Transfer | Server | Bookmarks | Help |
| | Site M | lanager | | | | Ctrl+S |
| | Сору | current | connectio | n to Site | Manager | |
| | New t | ab | | | | Ctrl+T |
| | Close tab | | Ctrl+W | | | |
| | Export Import Show files currently being edited | | | | | |
| | | | | | | |
| | | | Ctrl+E | | | |
| | Exit | | | | | Ctrl+Q |
| _ | | | | My Musi | c | |

Step 3

Click "New site" and make a new entry.

In this manual, We have named this entry "MySite".

*Step3 and Step4 are work to carry out only at the time of the first connection.

| Site Manager | × |
|--------------------------------------|--|
| Select entry: | General Advanced Transfer Settings Charset |
| ⊡ <mark>—</mark> My Sites | Protocol: FTP - File Transfer Protocol ~ |
| | Host: Port: |
| | Encryption: Use explicit FTP over TLS if available |
| | Logon Type: Ask for password V |
| | User: |
| | Password: |
| | |
| New site New folder | Background color: None V |
| New Book <u>m</u> ark <u>R</u> ename | Comments: |
| Delete Duplicate | |
| | <u>C</u> onnect <u>O</u> K Cancel |

Choose a tab of "General", and please input necessary information.

| Site Manager | | × | | |
|--|--|---|--|--|
| Select entry: | | General Advanced Transfer Settings Charset | | |
| ⊡ My Sites | | Protocol: SFTP - SSH File Transfer Protocol Host: upload.spinnet.jp Port: 8022 | | |
| | | Logon Type: Normal ✓ User: xxxxxxx@*****.att.ne.jp Password: ●●●●●●●●●●●●●●●●●●●●●●●●●●●●●●●●●●●● | | |
| New site New folder New Bookmark Rename Delete Duplicate | | Background color: None ~ Comments: | | |

| and please confirm setting again. | | OK Cancel | | |
| | | | | |
| Example of the error 2 | | | | |

"If you select the "Normal" logon type, a dialog may appear. In this case, please refer to the last section of this document.

When you have logged in before in "Ask for password", FileZilla does not store a password.

OK

Saving of passwords has been disabled by you. 'Normal' and 'Account' logontypes are not available. Your entry has been changed to 'Ask for password'.

When you succeed in connection, it becomes like the chart below.

If the connection fails, please review the Filezilla settings again.

Step7 explains a procedure of the file upload.

For example, there is "index.html" in the "HP_Cont" of your PC folder.

You can upload a file by moving "index.html" to a list of files of the SpinNet server by drag & drop from a list of left files.

Click an icon of the connection cutting, and finish work. The remote connection will be disconnected.

Connection cutting

With the above you complete setting.

Coping when you cannot let FileZilla store a password

Introduction

This section explains what to do if you cannot get FileZilla to save the ID and password information used to login to the SpinNet server.

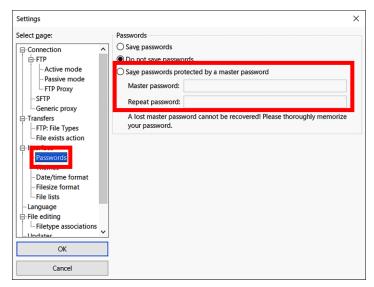

Step 1

Choose "Edit" from menubar, and please click "Setting".

| Æ | | |
|-------|---------------------------------------|--------------------------------|
| File | Edit View Transfer Server Bookmarks H | Help |
| | Network configuration wizard | ↓ I I Q @ 🚯 |
| Host: | Clear private data | Password: Port: Quickconnect 🔻 |
| 11030 | Settings | |
| | / | |

Step 2

Click "Passwords" and choose either of "Save passwords" "Save passwords protected by a master password" and you click "OK" and close a setting window. As the password is important information, you recommend that you protect it by a master password.

With the above you complete setting.
